The SMS provides basic manpower data on active duty military, civilian, reserve components, and retired military personnel of the Department of Defense. It is divided into the following sections: I - Total Department of Defense Personnel; II - Active Duty Military Personnel; III - Civilian Personnel; IV - Reserve Personnel; V - Other Personnel. Each section has a short narrative with a general description and selected highlights, displaying increases/decreases from the prior fiscal year and trends. The focus of this publication is on summary data for the Department of Defense as a whole, many tables also provide data for the Army, Navy, Marine Corps, Air Force, and other components of DoD. With a few exceptions, as noted on applicable tables, this issue contains data either for or through the Fiscal Year.

INTRODUCTION

This book contains summaries of basic manpower statistics -- active duty military, civilian, reserve components and retired.

The purpose is to present totals for the Department of Defense, but in most cases the figures for the Army, Navy, Marine Corps and Air Force are also shown.

Some pages are "time series" showing the trends over a period of years while others present the picture for the most recent date that figures were available at time of publication.

The page designation in the upper right corner is the page reference code of the Directorate for Information Operations and should be used in requesting additional or more recent data of the type shown.

PERSONNEL SUMMARY

Department of Defense "strength" is generally considered as the sum of active duty military personnel and civilian personnel -- nearly 4,700,000 persons at the end of December 1969.

In addition, our Personnel Summary shows reservists who are not on active duty and those training in schools and colleges.

Not shown here are approximately 650,000 retired military personnel and 4,350,000 dependents of active duty military personnel. Nor do these figures include the thousands of civilian employees of private industry engaged in defense work.

TOTAL MILITARY AND CIVILIAN PERSONNEL

The table at the right shows the trend in Department of Defense personnel over the past 30 years in war and in peace.

Civilian personnel figures shown here consist of direct hire employees only so that the totals will be comparable over the entire period. (Information on the number of indirect hire personnel is not available prior to 1953 -- see page 55.)

DEFENSE ORGANIZATIONAL COMPONENTS

The adjoining table shows the present organizational structure of the Department of Defense together with the numbers of personnel assigned to each organizational component.

In the Department of Defense Reorganization Act of 1958, the Secretary of Defense was authorized, whenever he determines it will be advantageous to the Government in terms of effectiveness, economy or efficiency, to provide for the carrying out of any supply or service activity common to more than one military department by a single agency or such other organizational entities as he deems appropriate. This authority was applied to the broad fields of atomic energy, communications, supply, etc. through the establishment of separate agencies within the Department of Defense but outside of the three military departments. Many of the personnel working in these fields previously assigned to the military departments were transferred to these new agencies.

DOD PERSONNEL BY STATE

The following 3 pages show the duty location of Department of Defense personnel by state. Census population estimates are also given.

The percentages shown provide comparative data indicating (a) the ratio of Defense personnel to state total population, and (b) the relative distribution of Defense personnel by state.

Of the 50 states, California has the largest number of Defense personnel (459,193), while Alaska has the greatest proportion of Defense personnel to total population (13.5 percent).

Hawaii has the next largest proportion of Defense personnel, who account for 7.5 percent of that State's total population.

ACTIVE DUTY MILITARY PERSONNEL

The table on the right shows the "ups and downs" of the military forces over the past fifty two years. Low and peak strengths are identified. Monthly strengths for the past eighteen months appear on page 20.

From August 1962, following the release from active duty of reserves recalled during the Berlin build-up, through the summer of 1965, active duty military strength was fairly constant. In more recent years, there has been a substantial increase in support of Southeast Asia operations.

The table on page 21 shows the average active duty military strength by fiscal year from 1941 through 1969. Direct military personnel costs from year to year have reflected these variations in average strength as well as increases in pay and allowances.

MILITARY GRADE STRUCTURE

The distribution of military personnel by grade is tabulated on the following page.

The numbers of officers in the grades of Major - Lt. Commander and above are limited by law, and there is an administrative limitation on the percent of officers to total military strength. Enlisted grades E-8 and E-9 were authorized by legislation enacted in 1958 which places restrictions on the numbers who may be advanced to these new grades.

The table on page 27 indicates the current grade titles corresponding to the various enlisted pay grades.

DEPLOYMENT OF MILITARY PERSONNEL

Substantial numbers of military personnel are stationed outside the United States.

About 1,000,000 military personnel have shore-based assignments in foreign countries, and, in addition, approximately 100,000 Navy and Marine Corps military personnel are assigned to fleet units in waters adjacent to foreign countries.

AGES OF MILITARY PERSONNEL

The essentially youthful nature of our military forces is highlighted by the data on the opposite page.

Most enlisted volunteers enter active service during their late "teens" with about one-seventh (currently) signing up for a second tour of duty. Officers first enter active duty at ages about four years older, and inductees (currently) at around 20 years of age. These first tour personnel currently make up about three-fifths of total forces and account for the low median 22.7 years of age on 30 June 1969.

On page 32, the percentage of total male military personnel in each age group is shown.

EDUCATIONAL LEVEL OF MILITARY PERSONNEL

The table on page 34 shows the percentages of officer and enlisted personnel who have completed various steps of formal high school and college training.

The military services provide the opportunity and encourage their personnel to continue academic study. There are after-hour study programs open to all, and also programs designed to give selected individuals further education in connection with their military career development.

During the past ten years the proportion of officers who are college graduates, and the proportion of enlisted who are high school graduates, has increased substantially (page 35). The changes are due mainly to greater selectivity in procurement and retention which have been dictated, to a great extent, by technological change and the resulting higher technical skill requirements.

a/ The percentage distributions should be considered as approximate. The estimates were derived from available internal service reports approximating the "as of" dates and were weighted by the "as of date" service strengths to arrive at DoD totals. Sample survey data were used for the Air Force and Army where census tabulations were not available. The educational level definitions used by the services have varied slightly from period to period, but in general the data reflect highest educational attainment including G.E.D. credits.

MILITARY DEPENDENTS AND MARITAL STATUS

Military dependents outnumber our military personnel in total, and there is wide variation in the average number of dependents per military person among the military services and between officers and enlisted personnel.

About 77 percent of officer personnel are married in contrast to a 42 percent figure for enlisted personnel.

WOMEN IN THE ARMED FORCES

The military medical services have enrolled nurses for many years.

It is now firmly established that there is a need and place for other women -- WACs, WAVEs, Women Marines and WAFs -- as an effective adjunct of the supporting forces.

Their continued employment by the armed forces provides a cadre for mobilization when manpower would be at a premium.

ENLISTED PROCUREMENT

The table at the right shows enlisted gains by source during the first six months of FY 1970.

Ordinarily most enlisted requirements are met by volunteers for military service. Inductions have been relatively high this year due to Army replacement requirements to maintain strengths necessary for Southeast Asia operations.

Enlisted procurement figures for past fiscal years are shown on page 42.

SELECTIVE SERVICE

The numbers of enlisted personnel who were inducted into the armed forces through the Selective Service System under the provisions of the Selective Service Act of 1948 are identified in the four following pages.

The number called each month is designed to maintain programmed strength after allowances have been made for projected enlistments, reenlistments and losses.

REENLISTMENT RATES

Of enlisted personnel separated from active duty during a given period who are eligible to reenlist, what percentage actually reenlist? The measure which answers this question is designated the "unadjusted reenlistment rate." This rate is tabulated on the following page for FY 1950 and subsequent years.

Unadjusted reenlistment rates improved considerably during the three years following the low point in FY 1954, remained relatively constant during FY 1958 through FY 1966, and have been declining during the last three and one-half years. Some of the year to year variations in over-all rates are due to variations in the proportions of "First Term" and "Career" Regulars. Separate rates for these categories are listed in the bottom table. "First Term" Regulars are those who have served an initial active duty tour as a Regular. "Career" Regulars are those who have served two or more tours of active duty.

Unadjusted reenlistment rates for total Regulars by the new standard DOD occupational groupings for Fiscal Years 1965 through 1969 are given in the table on page 50.

a/ Service reported "eligibles" vary slightly from numbers listed on monthly reports which are summarized on pages P29.20 through P29.34.

b/ Reported data do not permit derivation of reliable adjusted rates separately for FY 1966 and FY 1967, due to "involuntary extensions" which began in August 1965 with terminations completed by 31 December 1966. Rates are listed only for the two-year period.

CASUALTIES

The table on the following page summarizes the number of casualties incurred by U.S. forces in connection with the conflict in Viet-Nam in the past eight years as the result of actions by hostile forces.

On page 53 there is a statistical summary of principal wars in which the United States has participated, showing the number of U.S. military personnel serving on active duty during each war period and the casualties incurred. "Battle deaths" and "wounds not mortal" are casualties resulting from enemy action, while "other deaths" represent the number of in-service deaths, world-wide, from disease and injuries not the result of enemy action during the indicated war period. Battle deaths consist of killed in action, died of wounds, and died while missing or captured.

a/ Data prior to World War I are based upon incomplete records in many cases. Casualty data are confined to dead and wounded personnel and therefore exclude personnel captured or missing in action who were subsequently returned to military control. U.S. Coast Guard data are excluded.

b/ Authoritative statistics for the Confederate Forces are not available. Estimates of the number who served range from 600,000 to 1,500,000. The Final Report of the Provost Marshal General, 1863-1866, indicated 133,821 Confederate deaths (74,524 battle and 99,297 other) based upon incomplete returns. In addition, an estimated 26,000-31,000 Confederate personnel died in Union prisons.

c/ Data are for the period 1 December 1941 through 31 December 1946 when hostilities were officially terminated by Presidential Proclamation, but few battle deaths or wounds not mortal were incurred after the Japanese acceptance of Allied peace terms on 14 August 1945. Numbers serving from 1 December 1941 - 31 August 1945 were: Total - 14,903,213; Army - 10,420,000; Navy - 3,883,520; and Marine Corps - 599,693.

d/ Tentative final data based upon information available as of 30 September 1954, at which time 24 persons were still carried as missing in action.

e/ Number serving covers the period 21 April - 13 August 1898, while dead and wounded data are for the period 1 May - 31 August 1898. Active hostilities ceased on 13 August 1898, but ratifications of the treaty of peace were not exchanged between the United States and Spain until 11 April 1899.

f/ Includes Air Service. Battle deaths and wounds not mortal include casualties suffered by American forces in Northern Russia to 25 August 1919 and in Siberia to 1 April 1920. Other deaths cover the period 1 April 1917 - 31 December 1918.

g/ Includes Army Air Forces.

h/ Battle deaths and wounds not mortal include casualties incurred in October 1941 due to hostile action.

i/ Marine Corps data for World War II, the Spanish-American War and prior were represent the number of individuals wounded, whereas all other data in this column represent the total number (incidence) of wounds.

j/ Not known, but estimates range from 184,000 to 250,000.

k/ As reported by the Commissioner of Pensions in his Annual Report for Fiscal Year 1903.

Dashes (-) indicate that information is not available.

Office of Secretary of Defense
Revised 7 November 1957

CIVILIAN PERSONNEL - TOTAL

Most of the civilian personnel of the Department of Defense are hired directly by the military departments, the Defense agencies, or the Office of the Secretary of Defense and Joint Chiefs of Staff Organization as employees of the United States Government, and are designated as direct hire civilians. Some foreign nationals are employed in this manner in overseas areas in addition to U. S. citizens.

In a few foreign countries, however, substantial numbers of foreign nationals supporting military activities are technically employees of the host government (or an agency of that government) and are assigned to work with U.S. Forces under contracts or agreements with that government on a reimbursable cost or other predetermined basis. These foreign nationals are designated as indirect hire civilians.

Both categories of civilian personnel must be counted to provide a complete picture of the DOD civilian work force. Figures on the number of indirect hire civilians, however, are unavailable prior to 31 January 1953.

CIVILIAN PERSONNEL - DIRECT HIRE (1)

There have been wide fluctuations in the number of direct hire civilians employed by the Department of Defense in the past 30 years.

Beginning in January 1953, the definition of direct hire civilians was revised to include approximately 100,000 native Koreans and Ryukyuans who had not been included before that time. As a result, recent data on direct hire civilians are not strictly comparable with the older data.

These data comprise civilians paid from appropriated funds. They exclude civilian employees of military nonappropriated fund agencies such as post exchanges and commissaries.

CIVILIAN PERSONNEL - DIRECT HIRE (2)

It is frequently useful to distinguish between two broad groups of direct hire civilians, namely, salaried personnel and wage board personnel. The distinction is based on method of salary or wage determination.

Salaried personnel consist primarily of employees occupying positions subject to the Classification Act of 1949 as amended, plus those few employees whose compensation is established by acts other than the Classification Act, by executive order or by administrative determination.

Wage board personnel consist of employees whose compensation is determined by wage boards or similar administrative authority serving the same purpose, and is adjusted periodically in accordance with local prevailing wage rates.

In general, salaried personnel comprise technical, scientific, administrative, supervisory and clerical workers and for this reason are sometimes designated "white collar" employees. Wage board personnel, on the other hand, are usually craftsmen, production or maintenance workers and are therefore designated "blue collar" employees.

CIVILIAN PERSONNEL ACCESSIONS AND SEPARATIONS

The table on the opposite page shows the number of direct hire civilian personnel "gains" and "losses" in recent years.

During calendar year 1969, accessions and separations each averaged approximately 21,500 per month. Based on average strength, the monthly accessions and separations rates were about 1.65 percent each. These are equivalent to annual rates of about 20 percent.

However, the accessions for 1969 were somewhat distorted by the fact that in January about 40,000 National Guard Technicians became federal employees. Excluding these personnel the accession rate for January 1969 would be 1.55 and for the calendar year average 1.39 or an equivalent annual rate of 17 percent rather than 20.

CIVILIAN PERSONNEL BY COUNTRY

About 273,000 Department of Defense civilian personnel are employed in foreign countries, but only 28,000 of these are U.S. citizens.

The approximate 10,000 U.S. citizens employed in U.S. territories include persons who are U.S. citizens by virtue of citizenship in a U.S. territory, as well as U.S. citizens from the States.

RESERVE COMPONENTS SUMMARY

The table on the opposite page summarizes the current status of our Reservists -- members of Department of Defense reserve components.

Members of the Ready Reserve are subject to active duty in time of national emergency proclaimed by the President, as well as in time of war or national emergency declared by Congress. The Ready Reserve includes Reservists on active duty who were counted as part of active military strength in preceding tables. Ready Reservists not on active duty participate, to the extent required and subject to the availability of funds, in drills or training periods regularly scheduled throughout the year, in two weeks annual active duty training, and/or in various school and special active duty training programs.

Members of the Standby Reserve can be ordered involuntarily to active duty only as the result of Congressional action, and after the Director of Selective Service has determined their availability for active duty. They are not required to actively participate in reserve training.

The Retired Reserve consists of members of the reserve components who qualify for retirement through length of service, disability, etc., and who are formally placed on reserve retired lists.

RESERVE COMPONENTS SUMMARY - TIME SERIES (1)

This tabulation shows the trends in numbers of personnel assigned to the reserve categories established by the Armed Forces Reserve Act of 1952.

Although these categories became effective on 1 January 1953, complete reports by reserve category were unavailable prior to 31 March 1954.

Screening of the Ready Reserve is continuous to assure current availability of all members.

Following legislation establishing a ceiling on the number of Ready Reserves, effective 30 June 1957, the number of Ready Reserves not on active duty was maintained at slightly in excess of 2,400,000 until the spring of 1961, then dropped below 1,700,000 in 1963, and increased to 2,479,000 at the end of 1969.

RESERVE COMPONENTS SUMMARY - TIME SERIES (2)

This table shows the strength of the reserve components since World War II.

The number of reserve officers, including those on active duty, declined during the period 1953 through 1957 and leveled off at around 800,000 during the 1958 through 1965 period. The number increased to 903,000 at the end of 1969 mainly due to the increase in the size of the active forces.

The number of enlisted reserves has varied considerably over the years mainly due to variations in the numbers being released from active duty and reverting to the reserves for completion of their military service obligation. The number of enlisted reserves, including those on active duty, has increased from a low of 1,870,000 in 1963 to about 2,800,000 at the end of 1969.

RESERVES ON ACTIVE DUTY

The adjoining table shows the number of reservists, by component, who are serving with the active forces. They are included in the total active duty strengths shown in preceding tables. All of these reservists are in the Ready Reserve.

Some reservists undergo prescribed tours -- currently 4 months or more -- of active duty for training. They are not included in this table or counted as part of the total active duty strength.

Note that there are six Department of Defense reserve components, including the National Guard (Army) and the Air National Guard (Air Force).

Continuously, since WW II, there have been large numbers of reservists serving on active duty (page 78).

The number of reservists on active duty increased substantially during the fall of 1961 with the Berlin build-up, then declined in August 1962 as many were released from active duty. It remained fairly constant until June 1965, then again increased with the build-up of our forces in connection with the conflict in Southeast Asia.

RESERVES NOT ON ACTIVE DUTY

The table on the next page excludes reservists on active duty. These numbers measure the strength of reserve forces which can be mobilized in an emergency to supplement and replace active military forces.

The number of reservists not on active duty shrank during the Korean War as large numbers joined the active forces (page 81). Their numbers increased substantially after that time assisted by the compulsory reserve service provisions of the Armed Forces Reserve Act of 1952, as amended, and the Universal Military Training and Service Act, as amended.

All members of the Army National Guard and Air National Guard are included in the Ready Reserve; the size of these components is restricted mainly by annual appropriations for paid drill and active duty training. The other four reserve components contain Ready Reserves not in paid training, as well as Standby and Retired Reserves, and their strengths have varied considerably over the years.

RESERVES IN PAID STATUS

About one million Reservists are currently receiving pay for participation in reserve training programs.

These numbers are significant in determining reserve component personnel costs.

Paid status personnel are in the Ready Reserve category.

Personnel in paid status fall into several pay groups related to the various reserve training programs:

Pay Group	Annual Number of Paid Periods of Inactive Duty Training	Annual Paid Active Duty for Training
A	48	15 days
B	24	15 days
C	12	15 days
D	0	15 days
E	0	30 days
F	0	4 months minimum initial active duty training

ACTIVE DUTY BASIC TRAINING

One of the methods for young men to discharge their military obligation is to join a reserve component and take an initial tour of active duty for training (see pages 88 and 89). This tour is followed by a period of obligatory membership in the Ready or Standby Reserve.

After a slow start this program attracted large numbers of recruits who chose this method of fulfilling their required military service.

The officers in the active duty basic training program are mainly ROTC graduates who were excess to active force requirements when commissioned, and who, as a result, were not ordered to active duty.

RESERVE OFFICER TRAINING IN COLLEGES

The military services rely on ROTC programs in colleges and universities as a source of officer procurement.

They also sponsor military training in some high schools and other "junior" schools.

RETIRED MILITARY PERSONNEL

Since 1950 the number of retired military personnel has increased by about 400 percent.

The sharp increase is the consequence of large numbers who entered military service during WWII now qualifying for annuities.
