
Field windbreaks protect cropland from wind erosion while adding protection for crops, livestock, and homesteads. The Conservation Reserve Program (CRP) provides farmers and landowners with practices like this to achieve many farming and conservation goals. Whatever the conservation challenge - soil conservation, water quality protection or wildlife habitat enhancement - CRP is a proven land performance and management solution.

Why Field Windbreaks?

The damage incurred by strong and erratic winds on farms can be catastrophic. Rows of trees and shrubs forming windbreaks are designed to reduce wind's detrimental impact on farm fields, crops, homesteads, and livestock. Windbreaks can also provide critical food, cover and travel corridors for wildlife and gamebird species. Offered in continuous sign-up, CP-5A:

- Reduces wind erosion
- Protects crops, livestock and homesteads
- Increase bee pollination
- Creates habitat and safe travel paths for wildlife

Financial Benefits

**CP-5A participants are guaranteed:**

- 10-15 years of annual rental payments with an additional 20% Rental Rate Incentive
- Payments covering up to 90% of the eligible costs of establishing the practice
  - 50% from a Cost-Share Payment and
  - 40% from a Practice Incentive Payment (PIP)
- Sign-up Incentive Payment (SIP) up to $100/acre
- Mid-Contract Management Cost Share
- Maintenance Rate Incentive
- Additional incentives may be available in your state under the Conservation Reserve Enhancement Program (CREP)
Eligible Land

- Planted or considered planted 4 out of 6 years between 2008 and 2013
- Capable of being planted to an agricultural commodity
- Suitable for planting trees
- Compliant with USDA's highly erodible land and wetland provisions

Practice Requirements

- Noxious weeds and other undesirable plants, insects and pests shall be controlled
- The practice will be maintained without additional cost-share payments

Owner/Operator Eligibility

Participants must:

- Have owned or operated the land for more than 12 months prior to program sign-up
- Be in control of the land for the length of the contract
- Meet USDA payment eligibility provisions

Obligations

Participants will:

- Not harvest or graze the practice area except under certain approved conditions
- Work with USDA-approved conservationist to develop a conservation plan
- Perform periodic management activities according to the conservation plan
- Complete seeding of the practice within 12 months of the effective date of the contract

Proven Conservation Benefits

- In prime habitat, a 4% increase in CRP vegetation is associated with a 22% increase in pheasant counts
- CRP reduced nutrient losses in FY 2014 by an estimated 542 million pounds of nitrogen and 108 million pounds of phosphorus
- In 2014, CRP lowered greenhouse gas emissions by the equivalent of 43 million metric tons of CO2 – the same benefits as taking nearly 8 million cars off the road for a year

FSA will ultimately determine participant and land eligibility.
